

JOB OPENING: POWER PLANT MANAGER

Algona Municipal Utilities seeks a qualified candidate for the Power Plant Manager position. The Power Plant Manager is responsible for the operation and maintenance of the electric production, electric transmission, and system operations/dispatch at the Power Plant and Electric Substations. This position oversees power plant operations and maintenance staff, coordinates with the electric line department and other utility departments, and ensures safe, efficient, reliable generation and transmission to serve Algona Municipal Utilities' customers. The manager plays a key role in system reliability, regulatory compliance, budgeting, resource allocation, and staff development.

Applicants must reside in the Algona Municipal Utilities service area or another location approved by the General Manager. A candidate must have a high school diploma or GED and ten or more years of practical experience in operating and maintenance assignments in a diesel engine or steam power plant, including supervisory experience; an equivalent combination of training and experience may be considered. Knowledge of electric generation, transmission, and distribution facilities and the principles of electricity and power plant operations is required. An associate degree is preferred in a field that matches the technical requirements of a power plant and electric transmission system.

The full job description and application are available on our website at www.netamu.com. Applications, resumes, and cover letters may be submitted by email to hr@netamu.com or at the AMU Office, 104 W Call St, Algona, Iowa.

Applications will be accepted until position is filled. Offers are contingent on passing a background check and a pre-employment functional job analysis.

Algona Municipal Utilities is an Equal Opportunity Employer.
